INTRODUCING SLIMLINE SHADOW – INFRATECH'S NEW SLEEK INFRARED HEATER IN MATTE BLACK.

[OCTOBER 23, 2014] GARDENA, CA – At Infratech, we collaborate with leading architects, interior designers and engineers to provide low-profile, energy-efficient heating systems that blend seamlessly into a property's décor. With their classic, understated style, our versatile black W-series heaters have long been best sellers among our clients. Now, in response to customer demand, we are pleased to announce the latest addition to our line of heating systems – the Infratech Slimline Shadow single element heater.

The Slimline Shadow heater incorporates our popular Slimline SL-Series heating body in a matte black housing. With its sleek, modern styling, narrow profile, and low clearance requirements, the Slimline Shadow can virtually disappear into the surrounding décor. It is durable enough to weather years of outdoor use, and can be pole-mounted, wall-mounted, or ceiling-mounted. The Slimline Shadow is available in 1,600, 2,400, 3,000 and 4,000-watt models.
